

FEMME AESTHETICS
BY THE R CLINIC

AUSTRALIAN FIRST STUDY

In collaboration with INMODE we are conducting an Australian first study into the effects of radio-frequency device on the restoration of pelvic floor dysfunction.

Our women's wellness research study will consist of two groups of women:

- Women in 30-40s years of age, had childbirth via vaginal delivery, suffering symptoms of weak pelvic floor muscle/urinary incontinence/sexual dysfunction.
- Post menopausal women, suffering genitourinary syndrome of menopause

Register your interest

PATIENTS WILL RECEIVE 10+ TREATMENTS OVER A PERIOD OF 3 MONTHS.
